SUMMARY

Machine Learning Engineer focused on LLM fine-tuning, multi-agent systems, and production RAG. Built NLP models reaching 94.9% accuracy, shipped a multi-agent system at 83% routing accuracy, and delivered RLHF feedback on 500+ LLM responses. B.Tech CS, Minor in ML, Delhi Technological University (Jun 2026).

EDUCATION

Delhi Technological University (Formerly DCE)

New Delhi, India

B.Tech in Computer Science & Engineering, Minor in Machine Learning

Nov 2022 – Jun 2026

- **Relevant Coursework:** Machine Learning, Deep Learning, Natural Language Processing, Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems

EXPERIENCE

Outlier AI

Remote

AI Training Specialist & QA Reviewer – LLM Coding and Reasoning Evaluation

Jan 2026 – Apr 2026

- Delivered RLHF feedback on 500+ Python and C++ responses, strengthening LLM alignment and output quality in production workflows.
- Engineered adversarial edge-case tests that surfaced code-generation failures and reduced logic vulnerabilities in LLM outputs.
- Evaluated algorithmic correctness with rigorous NLP criteria, accelerating client model fine-tuning cycles.

Sparks Foundation

Remote

Data Science & Business Analytics Intern

Feb 2024 – Mar 2024

- Analyzed retail supermarket data in Python, identifying 3 operational bottlenecks and driving a 15% efficiency gain.
- Built a Tableau dashboard turning raw records into executive KPIs, raising metric visibility by up to 85%.

PROJECTS

SochSamajh AI | LangGraph, LangChain, FastAPI, React, TypeScript, Docker, LangSmith

[GitHub](#)

- Architected a 4-stage multi-agent system reaching 83% routing accuracy and 79.7 macro-F1 on a 300-query benchmark.
- Deployed pre-LLM safety screening that intercepts 100% of flagged inputs with sub-50ms overhead.
- Shipped a FastAPI and React/TypeScript app on Docker, with LangSmith tracing across 6+ LangGraph nodes.

Mental Health Detection | DistilBERT, PyTorch, Transformers, Hugging Face, AdamW

[GitHub](#)

- Fine-tuned DistilBERT on 48,827 Reddit posts for 3-class severity classification, cutting compute time by 40%.
- Attained 94.9% accuracy and 92.9% macro-F1, beating a TF-IDF baseline by +11 F1 points.
- Scaled training with PyTorch DDP across 2 GPUs, partitioning data and synchronizing gradients per step for a 1.8x speedup.

Document QA (RAG) | LangChain, FAISS, BM25, OpenAI API, Streamlit

[GitHub](#)

- Built a hybrid RAG system combining FAISS dense and BM25 sparse retrieval with adaptive chunking to reduce hallucination.
- A/B tested two retrieval configs (Top-3 vs. Top-5 with reranking) on a labeled QA set; the reranked variant lifted answer accuracy 10-15% at acceptable latency.
- Shipped a Streamlit interface for real-time multi-document querying with per-source attribution.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, TypeScript, SQL, Bash, Go

AI / ML: PyTorch, Scikit-learn, Transformers, Hugging Face, LangChain, LangGraph, OpenAI API, Gemini API, Feature Engineering, Sentence Transformers, ONNX, TensorRT

MLOps: RLHF, LLM Fine-tuning, LLM Evaluation, Distributed Training (DDP), A/B Testing, Model Serving, Model Monitoring, MLflow, Weights & Biases, LangSmith, Vertex AI, SageMaker, NLP, RAG

Engineering & Web: DSA, System Design, REST APIs, Data Pipelines, Docker, Kubernetes, CI/CD, Linux, FastAPI, React, Streamlit, Node.js

Cloud & Data: AWS (EC2, S3, Lambda), Azure, GCP, Nginx, Spark, Airflow, Kafka, dbt

Databases: PostgreSQL, MySQL, MongoDB, Redis, FAISS, Pinecone, Weaviate, ChromaDB

ACHIEVEMENTS

Competitive Programming: Solved 800+ problems; LeetCode Max Rating 1716 (Top 12%); Codeforces Specialist (Max Rating 1517).

Mentorship: Volunteer Mentor, Desh Ke Mentor (Govt. of NCT of Delhi) – guided junior students on career and academic goals.

Certifications: Andrew Ng's Machine Learning & Deep Learning Specializations (Coursera / DeepLearning.AI); Micro1 Certified AI Training Specialist & QA Reviewer (May 2026).
